Nice and clean appearance - Design similar to the prototype

This rough sketch is only for inspiration.

Book a trip

Functions must be the same, but the design must be the same as the prototype

It must not be possible to see the full length of the trip. Only the departure time: Sunday. 11. Dec. 13.05
 = Remove

The user chooses date and time and push set and is continued to page 4 in prototype where a box is shown over "current location" with date and time.

Functions like here. Design like the GoShare prototype design.

The text says "where are you going?"

The blue location sign must also be showed

ipnordic 4G   08.43

Indstil din destination

Markér placering   Søg

Bekræft destination

Same functions but design must be as Goshare prototype.

The marker/ needle must be another. The same as the white icon in the green circle beside "Set location on map" on page 4

When the marker has been set, there is a green dynamic line which moves from side to side until the user push confirm destination.

This page must be accessible from "Set location on map" and the green plus icon on page 4
